7/19/2006

****WARNING** This table is for comparison purposes only. The "Performance Equivalents" were determined from data published in the Geotechnical Fabrics Report (GFR), "Specifier's Guide 2006 and from Manufacturer's websites. These geotextile products are the closest "Performance Equivalents" and do not necessarily match properties in every case. This Table should in no way be used as a guide by itself; always review specifications. All "Performance Equivalents" should be determined by the Engineer. The user accept the responsibility of reviewing and updating this table.
